- **Front-end:** VueJS, Stylus, Pug, jQuery, Bootstrap
- **Back-end:** Flask, Express, Spark, MySQL, MongoDB
- **Miscellaneous:** Git, junit, Arduino, Heroku, Linux

Projects

DNace

ReactJS, ExpressJS

- A bioinformatics web app which performs and reports several stats regarding your DNA sequence, such as GC content, codon and amino acid composition, as well as the sequence's transcript. Utilized ReactJS, ExpressJS, ChartJS, Stylus, MaterializeCSS and TrianglifyJS. Hosted on Heroku.

PeerFindr

Flask, Bootstrap, SQLite

- Web app which allowed incoming freshmen at The City College of New York, to see if they shared classes with other registered incoming freshmen prior to the commencement of their first semester. Made with Flask, SQLite, LessCSS, and Bootstrap.

eng2bsl

Spark, Velocity

- Web app serves as an English text to British Sign Language translator. There are many English to British Sign Language online dictionaries, but not any translators. Used the SignBSL API, as well as Spark, Velocity templates, and jSoup.

Personal Website

ReactJS

- My own little corner of the interwebs. Made using ReactJS, MaterializeCSS, Stylus, ParticleJS, and TypedJS in under a day.
